

## RFID Labels

### RFID LABELS FOR ALL THE LIBRARY ITEMS

P.V. Supa offers RFID labels for all different kinds of items that libraries have, such as books and CD/DVDs. In addition to normal RFID-labels there are also so called Booster-tags available for CDs and DVDs. These are bigger and have better performance. The materials used in these RFID- tags are very high quality and with rigorous quality assurance in manufacturing, a very long life and proper operation in library environment is assured.

An RFID label consists of an aluminium antenna and a very small microchip attached to the antenna. For protection of the antenna and microchip there is a paper or plastic (PP) face material. On the back side of the label there is an adhesive layer that holds the label on an item. This adhesive is stable and there is no risk of its leakage over the edges of the tag, even for a very long period of time. Naturally all materials used meet modern environmental requirements.

Labels meet the requirements of ISO 15693 and ISO 18000-3 standards and work in the 13.56 MHz frequency that is commonly used in library environment. RFID labels are also fully compliant with most common library data models. Labels are available with colour printing, and it is also possible to print barcodes on the surface, with running ID numbers.

Tags can be preprogrammed with correct type of item identifiers. There are lots of different sizes and forms of tags for different applications available. For example we can offer printed library cards that also contains an RFID tag.

› **Very good performance**

› **Meets the libraries quality requirements**

› **Long life operation**

› **Compliant with all the modern environmental requirements**

› **Assured item identification**

› **Optional high tech printing on the labels**

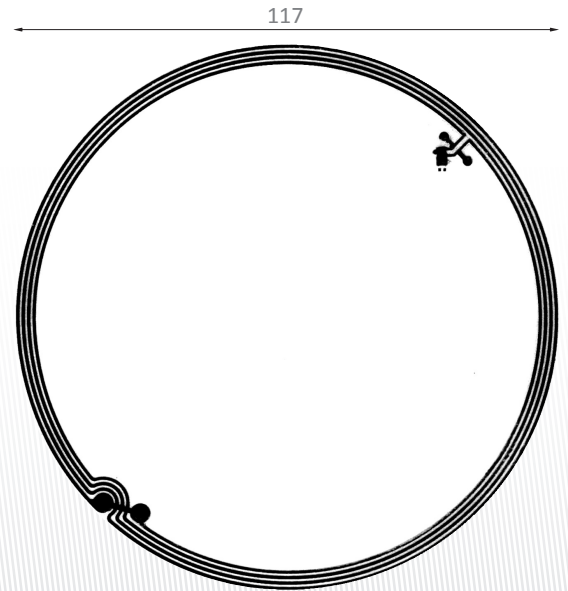

SMALL BOOK LABEL

STANDARD BOOK LABEL

SMALL CD/DVD TAG

BOOSTER CD/DVD TAG

## GENERAL:

- › Operating frequency: 13.56 MHz
- › RFID Standards: ISO15693, 18000-3-1
- › Microchip: NXP SLIX
- › Memory: 1024 bit
- › Face material: paper or plastic (PP)
- › Color or other high tech printing optional
- › Preprogrammed tags optional

## COMPATIBILITY:

- › Compatible with all common library RFID Data Models: For example DDM, KATVE, TechLogic, TV2, 3M, TRC, ITG, ITG2, ISO28560
- › Guaranteed operation with P.V. Supa or other standard RFID devices

## TECHNICAL INFORMATION:

- › Standard book label: 50 x 80 mm
- › Small book label: 50 x 50 mm
- › Booster CD/DVD label:  $\varnothing$  117mm, internal  $\varnothing$  17 mm
- › Small CD/DVD label:  $\varnothing$  40mm, internal  $\varnothing$  17 mm
- › Other sizes possible
- › Certificates:
